## The Jupiter Global Fund - Jupiter Global Convertibles

### (the 'Fund'), a sub-fund of The Jupiter Global Fund (the 'Company')

Class I EUR Acc (ISIN - LU0522256634)

The management company is Jupiter Asset Management International S.A. ("the Management Company").

### Objectives and investment policy

The Fund's objective is to achieve long term capital growth. The Fund invests in a broad spectrum of convertible bonds issued throughout the world, including in Emerging Markets.

Examples of the convertible securities which may be acquired for the Fund include convertible bonds, convertible preference shares, mandatory convertibles and other convertible or exchangeable securities. The Fund may invest, without limit, in securities rated investment grade, sub-investment grade or unrated.

The Fund may invest up to:

- 20% in contingent convertible bonds (bonds which can, on occurrence of a predetermined event, be converted into shares of the issuer).
- 10% in distressed bonds (bonds of companies or governments which are experiencing financial or operational distress, default or may be in bankruptcy) at the time of purchase.
- 20% in the China interbank bond market including via China Bond Connect.
- 20% in perpetual bonds (bonds with no maturity date).

### Benchmark Information

Refinitiv Convertible Global Focus Hedged EUR

The Fund is actively managed and uses the benchmark for index performance comparison purposes only. This means the Investment Manager is taking investment decisions with the intention of achieving the Fund's investment objective without reference to a benchmark. The Investment Manager is not in any way constrained by a benchmark in its portfolio positioning.

Any income arising in relation to this share class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

Investors are able to buy and sell shares during any business day. If you tell us to buy

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,  
lower risk

Typically higher rewards,  
higher risk

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- **Interest Rate Risk** - The Fund can invest in assets whose value is sensitive to changes in interest rates (for example bonds) meaning that the value of these investments may fluctuate significantly with movement in interest rates e.g. the value of a bond tends to decrease when interest rates rise.
- **Credit Risk** - The issuer of a bond or a similar investment within the Fund may not pay income or repay capital to the Fund when due.
- **Derivative risk** - the Fund may use derivatives to reduce costs and/or the overall risk of the Fund (this is also known as Efficient Portfolio Management or "EPM"). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the Fund.
- **Share Class Hedging Risk** - The share class hedging process can cause the value of investments to fall due to market movements, rebalancing considerations and, in extreme circumstances, default by the counterparty providing the hedging contract.
- **Contingent convertible bonds** - The Fund may invest in contingent convertible bonds. These instruments may experience material losses based on certain trigger events. Specifically these triggers may result in a partial or total loss of value, or the investments may be converted into equity, both of which are likely to entail

significant losses.

- **Sub investment grade bonds** - The fund may invest a significant portion of its assets in securities which are those rated below investment grade by a credit rating agency. They are considered to have a greater risk of loss of capital or failing to meet their income payment obligations than higher rated investment grade bonds.
- **Pricing risk** - Price movements in financial assets mean the value of assets can fall as well as rise, with this risk typically amplified in more volatile market conditions.
- **Counterparty Default Risk** - The risk of losses due to the default of a counterparty e.g. on a derivatives contract or a custodian that is safeguarding the Fund's assets.
- **Bond Connect Risk** - The rules of the Bond Connect scheme may not always permit the Fund to sell its assets, and may cause the Fund to suffer losses on an investment.
- **Convertible bonds** - The fund may invest in convertible bonds which are exposed to credit, equity and interest rate risk. Volatility of these investments may be higher than other types of bonds and liquidity also tends to deteriorate quickly in more stressed markets.
- **Charges from capital** - Some or all of the Fund's charges are taken from capital. Should there not be sufficient capital growth in the Fund this may cause capital erosion.
- For a more detailed explanation of risk factors, please refer to the "Risk Factors" section of the Prospectus.

## Charges

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out. In some cases, you might pay less and you can find out the actual entry and exit charges from your financial adviser or distributor.

### Charges taken from the Fund over a year

Ongoing charges	0.91%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure is based on the annual charges as detailed in the prospectus. Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- Conversion fee of up to 1.00% of the gross amount being converted may be applied for conversions between classes of the same sub-fund and from one sub-fund to another sub-fund.
- For detailed information about charges, please refer to the Company's prospectus, section "General Information".
